Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

<u>Listing of Claims:</u>

1	1.	(Currently amended) A computer-implemented method of depicting a plurality of
2		items and how said plurality of items satisfy multiple criteria, the method comprising
3		the steps of:
4		displaying in a particular order a list of visual indicators, wherein the particular order
5		indicates how a plurality of items satisfy a first criteria;
6		detecting input indicating the selection of a second criteria; and
7		while retaining said particular order, displaying a visual indication of how said
8		plurality of items satisfy a second criteria.
1	2.	(Original) The method of claim 1, wherein the steps further include
2		a browser receiving a self-contained page; and
3		wherein the steps are performed by said browser in response to executing said self-
4		contained page, without said browser having to interact over a network with a
5		server to determine how said plurality of items satisfy said second condition.
1	3.	(Original) The method of claim 2, wherein the step of the browser receiving the self-
2		contained page includes the browser receiving the self-contained page over the
3		network from the server.
1	4.	(Original) The method of claim 2, wherein the step of the browser receiving the self-
2		contained page includes said browser causing said self-contained page to be read
3		from removable computer-media.

1	5.	(Original) The method of claim 1, wherein the step of displaying a visual indication
2		includes displaying one or more other visual indicators visually associated with a

- 3 subset of items that satisfy said second criteria.
- 1 6. (Original) The method of claim 1, wherein the step of displaying a visual indication
- 2 includes altering the visual appearance of one or more visual indicators from said list
- 3 of visual indicators.
- 1 7. (Original) The method of claim 1, wherein
- 2 said first criteria is based on an alphabetic order of names associated with said
- 3 plurality of items; and
- 4 the particular order of the list of visual indicators indicates the alphabetic order of the
- 5 name of the items.
- 1 8. (Original) The method of claim 1, wherein:
- 2 the step of detecting input indicating the selection of a second criteria includes
- detecting input selecting a particular category of a plurality of categories; and
- 4 the step of displaying a visual indication of how said plurality of items satisfy a
- 5 second criteria includes displaying a visual indication of which items of said
- 6 plurality of items belong to said particular category.
- 1 9. (Original) The method of claim 8, wherein said step of detecting input selecting a
- 2 particular category includes detecting that a user has selected said particular category
- as a selection in a list box listing said plurality of categories as selections.
- 1 10. (Original) The method of claim 1, wherein the steps further include:
- detecting input indicating the selection of a third criteria; and
- while retaining said particular order, displaying a visual indication of how said
- 4 plurality of items satisfy said third criteria, wherein said third criteria is
- 5 different from said second criteria.

I	11.	(Original) A method of generating a page this causes a browser to depict a plurality o
2		items and how said plurality of items satisfy multiple criteria, the method comprising
3		the steps of:
4		generating first page elements that cause said browser to display in a particular order
5		a list of visual indicators, wherein the particular order indicates how said
6		plurality of items satisfy a first criteria;
7		generating one or more second page elements that enable the browser to receive user
8		input indicating a selection of one or more criteria of a plurality of criteria;
9		and
10		generating third page elements that cause the browser to display, for each particular
11		criterion of a plurality of criteria, a visual indication of how said plurality of
12		items satisfy said particular criterion, without changing said particular order,
13		in response to receiving user input indicating a selection of said particular
14		criterion.
1	12.	(Original) The method of Claim 11, wherein:
2		the steps further include issuing a query to a database system that stores information
3		about said plurality of items, wherein said query requests data that may be
4		used to determine which set of items of said plurality of items satisfy a first
5		criterion of said plurality of criteria;
6		receiving results of the query from the database system; and
7		wherein the step of generating third page elements is based on an examination of the
8		results.

1	13.	(Original) The method of claim 11, wherein the steps further include
2		performing an examination of contents of said plurality of items to determine which of
3		said plurality of elements satisfy a particular criteria of said plurality of
4		criteria;
5		wherein the step of generating third page elements is based on said examination of
5		the contents.
1	14.	(Original) A computer-readable medium carrying one or more sequences of
2		instructions for depicting a plurality of items and how said plurality of items satisfy
3	1	multiple criteria, wherein execution of the one or more sequences of instructions by
4		one or more processors causes the one or more processors to perform the steps of:
5		displaying in a particular order a list of visual indicators, wherein the particular order
5		indicates how a plurality of items satisfy a first criteria;
7		detecting input indicating the selection of a second criteria; and
3		while retaining said particular order, displaying a visual indication of how said
•		plurality of items satisfy a second criteria.
l	15.	(Original) The computer-readable medium of claim 14, wherein the
2		steps further include
3		a browser receiving a self-contained page; and
1		wherein the steps are performed by said browser in response to executing said self-
5		contained page, without said browser having to interact over a network with a
5		server to determine how said plurality of items satisfy said second condition.
l	16.	(Original) The computer-readable medium of claim 15, wherein the step of the
2		browser receiving the self-contained page includes the browser receiving the self-
3		contained page over the network from the server.

- 1 17. (Original) The computer-readable medium of claim 15, wherein the step of the
- 2 browser receiving the self-contained page includes said browser causing said self-
- 3 contained page to be read from removable computer-media.
- 1 18. (Original) The computer-readable medium of claim 14, wherein the step of displaying
- 2 a visual indication includes displaying one or more other visual indicators visually
- associated with a subset of items that satisfy said second criteria.
- 1 19. (Original) The computer-readable medium of claim 14, wherein the step of displaying
- 2 a visual indication includes altering the visual appearance of one or more visual
- 3 indicators from said list of visual indicators.
- 1 20. (Original) The computer-readable medium of claim 14, wherein
- 2 said first criteria is based on an alphabetic order of names associated with said
- 3 plurality of items; and
- 4 the particular order of the list of visual indicators indicates the alphabetic order of the
- 5 name of the items.
- 1 21. (Original) The computer-readable medium of claim 14, wherein:
- 2 the step of detecting input indicating the selection of a second criteria includes
- detecting input selecting a particular category of a plurality of categories; and
- 4 the step of displaying a visual indication of how said plurality of items satisfy a
- 5 second criteria includes displaying a visual indication of which items of said
- 6 plurality of items belong to said particular category.
- 1 22. (Original) The computer-readable medium of claim 21, wherein said step of detecting
- 2 input selecting a particular category includes detecting that a user has selected said
- 3 particular category as a selection in a list box listing said plurality of categories as
- 4 selections.

1	23.	(Original) The computer-readable medium of claim 14, wherein the steps further
2		include:
3		detecting input indicating the selection of a third criteria; and
4		while retaining said particular order, displaying a visual indication of how said
5		plurality of items satisfy said third criteria, wherein said third criteria is
6		different from said second criteria.
1	24.	(Original) A computer-readable medium carrying one or more sequences of
2		instructions for generating a page this causes a browser to depict a plurality of items
3		and how said plurality of items satisfy multiple criteria, wherein execution of the one
4		or more sequences of instructions by one or more processors causes the one or more
5		processors to perform the steps of:
6		generating first page elements that cause said browser to display in a particular order
7		a list of visual indicators, wherein the particular order indicates how said
8		plurality of items satisfy a first criteria;
9		generating one or more second page elements that enable the browser to receive user
10		input indicating a selection of one or more criteria of a plurality of criteria;
11		and
12		generating third page elements that cause the browser to display, for each particular
13		criterion of a plurality of criteria, a visual indication of how said plurality of
14		items satisfy said particular criterion, without changing said particular order,
15		in response to receiving user input indicating a selection of said particular
16		criterion.
1	25.	(Original) The computer-readable medium of Claim 24, wherein:
2		the steps further include issuing a query to a database system that stores information
3		about said plurality of items, wherein said query requests data that may be

	4	used to determine which set of items of said plurality of items satisfy a first
	5	criterion of said plurality of criteria;
	6	receiving results of the query from the database system; and
	7	wherein the step of generating third page elements is based on an examination of the
	8	results.
1	26.	(Original) The computer-readable medium of claim 24, wherein the steps further include
2		performing an examination of contents of said plurality of items to determine which of
3		said plurality of elements satisfy a particular criteria of said plurality of criteria;
4		wherein the step of generating third page elements is based on said examination of the
5		contents.
